LNI Swissgas
Year 2020

PREFACE

LNI Swissgas

PROFIT

PLANET

PEOPLE

For over 30 years we have been helping our customers with our gas generation and calibration solutions. We are an economically sound and independent family owned business, with a long-term focus.

Innovation is part of the LNI Swissgas DNA. Our greatest source of innovation is our people: employees and customers. Their well-being and their success are our success. We strive to deliver premium products with a green aspect developing the latest technologies to insure safety and reduce energy consumption, noise levels and environmental impact.

The global challenge of the COVID-19 pandemic during 2020 has forced us to change many of our habits and adapt sustainable alternatives in our lives. At LNI Swissgas, we also continuously strive to change our practices for the better. While our product is a sustainable alternative to traditional gas supplies, our industry in itself remains resource intensive. That is why we have committed to the sustainable sourcing of resources and technological innovation to lead the way in sustainability.

WHO ARE WE

LNI Swissgas 2020

MULTINATIONAL BUT LOCAL!

LNI Swissgas has always been one of the main brands in the gas generation and calibration sector. LNI Swissgas is a **multinational corporation** that is growing very fast: we now have **local** sales and service offices located on 5 continents and have two factories that maintain at least 50% **local supplier** content. This allows for better control of supply sources, leading to higher product quality and a reduction of pollution as well as developing the **local economy**.

WHO ARE WE

LNI Swissgas 2020

A GREEN GAS PRODUCER!

LNI Swissgas is committed to **reducing energy consumption**, an environmentally friendly aspect that is often neglected on similar equipment. First of all, on-site gas generation reduces carbon emissions by using renewable sources, such as water and air, to produce pure gases onsite eliminating the need for gas deliveries. All of our products are delivered to our customers using the most **sustainable packaging** available. Our products also utilize technology that enables on-demand gas generation and standby functions, **eliminating gas waste**. The remote diagnostics capability on our products helps us to support our customers quickly while avoiding travel, whenever possible, and the environmental impact it imposes on our planet.

WHO ARE WE

LNI Swissgas 2020

MULTICULTURAL AND COMMITTED TO ONE GOAL

Eventhough our company spans five continents and includes many different cultures there remains on common goal: **sustainability** and **responsibility** is our key to success. Success is also measured by the relationships with our employees, partners, customers and suppliers that are based on **trust** and **fairness**. LNI Swissgas has always pursued a corporate philosophy of flexibility, transparency and trust. This corporate philosophy is embraced and practiced by everyone in the company. The people of LNI Swissgas are **committed** to maintaining the premium quality of our products while practicing daily actions that support sustainability such as reducing packaging consumption, avoiding plastic and by carefully sorting their own waste.
